## Contents

Lech BUKOWSKI  
Preface ................................................................. 5  

Tomasz AMBROZIAK, Konrad LEWCZUK  
A method for scheduling the goods receiving process in warehouse facilities ........................................ 7  

Tomasz AMBROZIAK, Dariusz PYZA  
Selected aspects of transportation system modelling ................................................................. 15  

Paweł HANCZAR  
Transport planning in conditions of different transport tariffs  
– application of integer programming .................................................. 25  

Marianna JACYNA, Krystian WISNIEWSKI  
A static model for selecting technical facilities of a logistics centre  
based on the tasks to be performed .................................................. 33  

Tomasz JANIK, Piotr ŁEBKOWSKI  
Rescheduling of arrivals and departures at multi-runway airports .................................................. 43  

Barbara JÓŹWIAK, Józef OKULEWICZ, Barbara WĘGRZYNOWICZ  
Programming of controlling of a conveyor transport system .................................................. 57  

Marcin KLIMEK, Piotr ŁEBKOWSKI  
Predictive scheduling with determined terms of milestone achievement ........................................ 69  

Antoni KORCYL  
Optimisation of facility location – heuristics approach .................................................. 81  

Stanisław KRAWCZYK  
Supply strategy development in production enterprises .................................................. 89  

Marek MAGIERA  
Two-level of production scheduling for flow-shop systems  
with intermediate storages .................................................. 101  

Barbara MAŻBIK-KULMA, Jan W. OWSIŃSKI, Krzysztof SĘP  
Application of selected methods of graph theory and combinatorial heuristics  
to minimising the number of transits nodes in an air network .................................................. 111  

Tomasz NOWAKOWSKI  
Problems of supply process reliability assessment at small and medium-sized enterprises .......... 125  

Józef OKULEWICZ, Tadeusz SALAMONOWICZ  
Preventive maintenance of technical systems  
as part of risk management .................................................. 137
Grażyna RADZIEJOWSKA
Quality of the logistic customer service in service area ........................................... 145

Tadeusz SAWIK
Integrated scheduling in a supply chain by mixed integer programming ........................ 153

Natalia SZOZDA, Artur ŚWIERCZEK
The success factors for supply chains of a short life cycle product .............................. 163

Leo TVRDON, Radim LENORT
Simulation of capacity expansion for production process of electromotors ...................... 175

Marcin WOCH, Piotr LEBKOWSKI
Manufacturing cost management in Microsoft Dynamics NAV 5.0 – a case study ................ 185

Abstracts in Polish ........................................................................................................ 195

Style sheet for authors .................................................................................................. 201
