Abstract	7
Streszczenie.....	8
Preface	11
1. Contemporary search metaheuristics	17
1.1. Search problems and heuristic techniques	17
1.1.1. Difficult search problems	18
1.1.2. Metaheuristic and heuristic search methods	19
1.1.3. Selected single-solution metaheuristics	20
1.2. Evolutionary metaheuristic techniques	23
1.2.1. Avoiding the local extrema	24
1.2.2. Diversity in evolutionary algorithms.....	25
1.2.3. Stopping criteria for the evolutionary algorithms	27
1.3. Hybrid search methods	28
1.3.1. Classification of hybrid methods.....	28
1.3.2. Cultural and memetic computing	30
1.3.3. Immunological metaheuristic techniques.....	34
1.4. Agent-based computing	36
1.5. Vacant niches in theory and practice.....	41
2. Evolutionary multi-agent systems	44
2.1. Agent-based architectures of computing systems.....	45
2.2. Evolutionary multi-agent system	46
2.2.1. EMAS concept	47
2.2.2. Formal definition of EMAS	50
2.2.3. EMAS actions	57
2.2.4. EMAS management	66

2.3.	Immunological evolutionary multi-agent system	70
2.3.1.	iEMAS concept	70
2.3.2.	Formal definition of iEMAS	72
2.3.3.	iEMAS management	77
2.4.	Towards verification of EMAS	81
3.	Formal aspects of agent-based metaheuristics	82
3.1.	Formal analysis of EMAS.....	82
3.1.1.	EMAS dynamics	83
3.1.2.	Ergodicity of EMAS	85
3.2.	Formal analysis of iEMAS	89
3.2.1.	iEMAS dynamics	89
3.2.2.	Ergodicity of iEMAS	92
3.3.	Goals attained in formal analysis.....	96
4.	Experimental verification of EMAS	97
4.1.	EMAS in solving benchmark problems.....	97
4.1.1.	Definition of benchmark problems	98
4.1.2.	Classical EMAS and PEA.....	100
4.1.3.	Memetic EMAS and PEA	103
4.1.4.	Classical and immunological EMAS	112
4.2.	EMAS parameters tuning.....	113
4.2.1.	Energy-related parameters	113
4.2.2.	Probabilistic decision parameters.....	117
4.2.3.	Immunological parameters.....	120
4.2.4.	Parameters tuning recapitulation.....	124
4.3.	EMAS in real-world problems.....	125
4.3.1.	Step and flash imprint lithography inverse problem	126
4.3.2.	Advisory strategy parameters optimisation.....	134
4.4.	Goals attained in experimental verification	141
	Summary.....	142
	A. Experimental configuration details	145
	B. Technical details of EMAS ergodicity proof.....	149
	Bibliography	161
